The POS T. - Shelf Management System

POS TUNING
Udo Voßhenrich ®
The POS τ - shelf management system with Product Pusher ...

Ingeniously easy to implement and achieve total optimization of product presentation, simultaneously reducing the need for shelf maintenance.

Not just 'only' a plastic divider but a system completely versatile, offering intelligent and sophisticated solution.

Available in heights of 60 mm and 120 mm - lengths of 180mm to 580 mm. Bespoke versions also available. System **"F"** dividers enable the product to be placed at the very front edge of the shelf, without the loss of space.

**1** A divider for "square-edged" products - without the need for rear fixation.

2 A divider - 120 mm height - with holes punched at the front to take a railing for tall or "soft" products, merchandised in a portrait manner.

3 The lower fixing cams form a stable compartment when locking with the guide and stabilizer profile, specifically dividers (e.g. for round products on gravity shelves).

3
**4** The rear locks sit securely in the fixing ledge and make sure, that the installed compartment width remains permanent.

5 Optional divider clamps are available and can be subsequently mounted on the rear side of the divider, together with a second T-rail.

6 The LED unit promotes the use of light ensuring a unique and unequivocal illuminated appearance through the divider. Several light colors are at your choice.

The POS τ- Shelf Management System

All Purpose (Optional Solutions Available)

### Dividers in combination with POS τ Pusher Type "Mini W 19 mm"

For minimum compartment widths of 17 mm i.e. cosmetic products.

All information concerning this product range is available in the parts list "Pusher System Mini"

Dividers in combination with POS τ Pusher "System F"

All information concerning this product range are available in the parts list "Pusher System F"

Dividers in combination with POS τ Pusher "System T"

All information concerning this product range are available in the parts list "Pusher System T"
Dividers with customized front clamps, according to customers specification

For example:

A Typically "embracing" T-clip for T-rails
B Wire clip for connection with wire mesh shelves
C For insertion in U-profiles on shelf fronts
D All front fixations now available as a right / left hand version

"Bespoke" dividers produced in individual colors'

- in accordance to customer CI (Customer Identity)

All Purpose (Optional Solutions Available)

Design "Magic" - with LED-dividers

POS T - dividers with LED Lighting provide considerable visual impact to your range of products and promotions by illuminating the edges of the divider front profile.

No additional installation requirements - the power supply is provided by connecting a special divider clamp with the Adapter T-rail.

The U-Channel Pusher

for an optimum presentation of round or unstable products, customized to the product size and shelf dimensions

The "Shelf Tray" for entire product categories

tailored to size, according to product and shelf measurements

For more information please refer to the brochure "Brand*Server*".

The "Gravity Feed" server

A slightly inclined and extremely smooth surface ensures gravity, supports the sliding process of products towards the front of the shelf.

Consequent shelf organization

Sophisticated shelf trays for almost every product
- Please refer to example -
